EDUCATION

University of California, Los Angeles | Los Angeles, CA

June 2028

BS in Computer Science

GPA: 4.0/4.0

- Coursework: Computer Organization & Operating Systems, Data Structures & Algorithms, Introduction to C++
- Awards: UCLA APLUS Scholarship Endowment, Samueli Foundation Engineering Undergraduate Scholarship

EXPERIENCE

Tori in the House | Los Angeles, CA

May 2025 – Present

Software Development Intern

- Manage the full software development lifecycle (design, coding, testing, deployment) for a nonprofit platform
- Build **RESTful APIs** in **Node.js** and **Express** with JSON payloads, enabling secure real-time user interactions
- Integrate **Google Cloud APIs** (Gemini, Text-to-Speech) into distributed pipelines to deliver AI-powered features
- Utilize **Google Cloud Platform** services for backend architecture, optimizing data storage and deployment

Association for Computing Machinery | Los Angeles, CA

Nov. 2024 – Present

Full-Stack Developer

- Deliver production-ready features in **React**, **Next.js**, and **Express**, enhancing platform usability for **500+** users
- Utilize **Docker** containers to ensure consistent deployment across testing environments
- Migrate **500+ lines** of **JavaScript** to **TypeScript**, reducing runtime errors by **20%** and improving maintainability
- Practice agile teamwork with 15 developers through sprint planning, peer code reviews, and Git workflows

Society of Women Engineers (SWE) | Los Angeles, CA

Oct. 2024 – Present

Evening with Industry Committee, Logistics Chair

- Direct UCLA's largest student-run networking event, connecting **200+ students** with **20+ recruiters**
- Manage a **\$10K** budget, schedules, and workshops, ensuring high-quality engagement for **90+ students**
- Coordinate with industry professionals including AWS and PPG Industries on recruiting and technical initiatives

TECHNICAL PROJECTS

Robot Learning Simulation | *Reinforcement Learning (RL) and Robot Learning Lab*

- Designed **Python**-based robotic simulation in **Isaac Lab**, applying systems modeling with **30+** observation states
- Debugged and optimized PPO training pipelines in distributed environments, improving convergence
- Presented results to graduate researchers, synthesizing feedback into improved models

BruinBites | *Dining Hall Rating iOS App*

- Built a SwiftUI mobile app for browsing and rating campus dining halls
- Architected with modular Swift components and integrated **Firebase Firestore** for real-time database operations
- Automated data ingestion with a **Python** web scraper, reducing manual content updates by **90%**

Flight Itinerary | *Search Algorithm Scheduler*

- Implemented BFS, DFS, and Dijkstra's algorithms in **C++** for flight path planning across **1,000+** simulated flights
- Applied data structures and graph search optimizations to improve runtime and memory efficiency

SKILLS AND INTERESTS

Languages: C++, Python, Java, JavaScript, TypeScript, Swift, HTML, CSS

Frameworks & Tools: React, Node.js, Next.js, Firebase, MongoDB, Tailwind

Systems & Cloud: Docker, AWS, Google Cloud Platform
