EDUCATION

University of California, Los Angeles

June 2028

Bachelor of Science in Computer Science

GPA: 4.0/4.0

- Coursework: Computer Organization and Operating Systems, Data Structures and Algorithms, Introduction to C++, Introduction to Robotics, Logic Design of Digital Systems, Software Construction

EXPERIENCE

Slow Factory

Nov. 2025 – Present

Software Engineering Intern

Los Angeles, CA

- Convert static platform to **React Native** app for **100K+** users, promoting media sharing and community engagement
- Build and secure **PostgreSQL** database with **Supabase**, implementing Row-Level Security to manage user permissions
- Collaborate with **10** developers and designers following Agile sprints and best practices to drive product iterations

Daily Bruin

Oct. 2025 – Present

Software Engineering Intern

Los Angeles, CA

- Design internal content management system using **Python** and **Django**, supporting publication of **100+** flatpages
- Streamline formatting for **600+** journalists by engineering backend services to automatically generate **AML** files
- Collaborate with a **15-member** cross-functional team to containerize architecture using **Docker** and **Kubernetes**
- Deploy on **Digital Ocean** and **Cloud Flare**, producing special articles with **60,000+** weekly readers

Tori in the House

May 2025 – Nov. 2025

Software Developer Intern

Los Angeles, CA

- Won 1st place at hackathon among **20** teams, selected to continue building for the nonprofit organization
- Built full-stack web application with **React** and **Node.js**, improving client-server responsiveness and reliability
- Engineered **3 Google Cloud Platform** APIs (Gemini, Text-To-Speech, Cloud Translation) with **Express.js**
- Reduced manual workload by **80%** by automating data entry with **JavaScript** to populate Firebase database

PROJECTS

Bruin Plan | *React, Node.js, TypeScript, MySQL, Jest, Cucumber, Playwright*

Oct. 2025 – Dec. 2025

- Spearheaded design of fullstack **React** and **Node.js** web application, utilizing **UML** diagrams to model architecture
- Architected backend with **5** MySQL tables to query **200+** courses, handling authentication with JWT
- Developed comprehensive **REST APIs** to connect components and build end-to-end unit tests to validate workflows

Robot Learning Simulation | *Python, Isaac Lab, Isaac Sim*

June 2025 – Aug. 2025

- Developed physics-based robotics simulation in **Python** using NVIDIA **Isaac Lab** for construction safety at POSCO
- Configured **30** observation states across **32** environments using reinforcement learning to train single arm manipulation
- Achieved **95%** success rate with engineered reward functions and optimized multi-environment parallel training

Flight Itinerary | *C++, LLDB*

March 2025

- Implemented BFS and DFS in **C++** to generate optimized flight itineraries across **180,000+** simulated flights
- Debugged Dijkstra's algorithm with **LLDB** in **Xcode**, improving runtime efficiency by over **250%** (<800ms)

LEADERSHIP

Society of Women Engineers (SWE)

Oct. 2024 – Present

Evening with Industry Committee, Logistics Chair

- Connect **250+** students with **20+** companies by leading logistics for SWE's largest student-run networking event
- Manage a **\$20K** budget, schedules, and workshops, ensuring high-quality engagement for **90** student attendees
- Coordinate with **10+** industry leaders including AWS and PPG Industries on recruiting and technical initiatives

SKILLS

Languages: C++, Java, Python, JavaScript, TypeScript, HTML, CSS, SQL

Developer Tools: Google Cloud Platform, Firebase, MongoDB, MySQL, PostgreSQL, Supabase, Git, Docker, Kubernetes, Digital Ocean, Cloud Flare, Isaac Lab, Isaac Sim

Technologies/Frameworks: React, Node.js, Next.js, Express, Linux, GitHub, Jest, Cucumber, Playwright
