EDUCATION

University of California, Los Angeles | Los Angeles, CA

June 2028

BS in Computer Science

GPA: 4.0/4.0

- Coursework: Computer Organization & Operating Systems, Data Structures & Algorithms, Introduction to C++
- Awards: UCLA APLUS Scholarship Endowment, Samueli Foundation Engineering Undergraduate Scholarship

EXPERIENCE

Tori in the House | Los Angeles, CA

May 2025 – Present

Software Developer Intern

- Apply **object-oriented design principles** in a full-stack architecture using **React** and **Node.js**, creating modular, maintainable components and optimizing backend **API** flows
- Engineer **RESTful** backend services in **Node.js** and **JavaScript**, enabling dynamic session tracking and quiz-driven interactions at scale for a nonprofit platform
- Integrate **Google Cloud APIs** including Gemini, Text-to-Speech, and Speech-to-Text to generate multimodal outputs and store results in **Firestore**, enhancing accessibility and personalized user experience

Association for Computing Machinery | Los Angeles, CA

Nov. 2024 – Present

Full-Stack Developer

- Ship production-ready open-source application in **React** and **Next.js** for **500+** students across **9 committees**
- Migrate **1,000+** lines of JavaScript to TypeScript, reducing runtime errors by **20%** and improving type safety
- Communicate with **15-member** team to establish standardized practices across the open-source codebase

Society of Women Engineers (SWE) | Los Angeles, CA

Oct. 2024 – Present

Evening with Industry Committee, Logistics Chair

- Lead logistics for SWE's largest student-run networking event, connecting **200+ students** and **20+ companies** with **10% of attendees** advancing to next-round interviews through recruiter engagement
- Collaborate with company recruiters and industry professionals to coordinate participation and hiring initiatives
- Oversee committee budget for external workshops, resume reviews, and mock interviews for **90+ students**
- Work with **team of 7** to manage site visits at **PPG Industries** and AWS workshops with **Amazon**

TECHNICAL PROJECTS

Robot Learning Simulation | *Reinforcement Learning (RL) and Robot Learning Lab*

- Built a robotic simulation in **Python** using **Isaac Lab**, applying reinforcement learning and custom reward functions to solve **MDP-based** tasks in high-dimensional, real-world environments
- Designed reinforcement learning parameters, integrating **30+ observation** states in **32 training environments**, domain randomization, and curriculum learning to accelerate convergence
- Collaborated with Prof. Youngwoon Lee to refine RL training pipeline for improved task completion success rate

BruinBites | *Dining Hall Rating iOS App*

- Designed an app using **SwiftUI** that lets students browse, rate, and review on-campus dining halls
- Architected app with Swift **components**, **modular classes** and **extensions** for maintainability and scalability
- Integrated **Firebase Firestore** for scalable real-time data storage and retrieval to enable responsive interactions
- Automated data collection with **Python web scraper** and integrated with **SwiftUI** and **Firebase** app to keep content up-to-date in real-time with minimal human input

SKILLS AND INTERESTS

Languages & Frameworks: C++, JavaScript, Python, React, SwiftUI, CSS, Java, TypeScript

Backend & Platforms: Node.js, Express, REST APIs, Firebase

DevOps & Tools: Docker, AWS, Google Cloud, Git
